

Intelligent System Solutions Corp.

**Position: Software Developer**

Job Title: Software Developer  
Location: St. John's, Newfoundland, Canada  
Posted: February 5, 2007

**Job Description:**

This is an exciting opportunity for an experienced software developer/engineer to work in the field of image analysis and pattern recognition software development. You will design and implement a variety of intelligent system algorithms and end-user applications for various industry applications. You will be part of a small team of engineers and you will be expected to work independently and as part of the team. You will be required to develop algorithms, prototype/commercial software solutions and test software performance.

**Requirements:**

This position requires a solid background in software design, programming in C and software testing. A bachelor's degree in Electrical Engineering, Software Engineering, Computer Science or a related field is required. Desirable experience includes professional software development, digital image processing and pattern recognition. Experience programming Windows applications would also be an asset.

Please send CV to:

iSYS Corporation  
702 Water Street  
St. John's, NL  
Canada  
A1E 1C1
